PostgreSql | Intermediate

DevOps & Tools

Linux | Intermediate   Docker | Intermediate   GIT & Github | Advanced

Frontend & other

C++ | Beginner   HTML & CSS | Advanced   JavaScript | Intermediate

Portfolio

Online Store

Design and development of an online store using Django and Django REST Framework for managing users, products, and orders.
The database is developed with SQLite3, and the front-end is implemented using HTML5, CSS3, and JavaScript. The project is still under development.
